

Liberty Utilities Presents.....

“Beyond Reasonable Drought”

K-12 Teacher Workshop

What do you think when you hear the word “drought?” Do you think “dry,” “hot,” “dusty,” “cracked earth,” or even “no water”? If so, you’re on the right track!

When a place is in a drought, it is arid and often dusty; cracks may appear in the soil, and rivers, lakes, streams, and other sources of water can go dry. A drought means that a region has less precipitation (rain or snow) than normal over a few months, years or even longer.

What causes a drought? How does it really affect us? How can we prepare for drought? These are all important questions that will be answered during this two hour workshop which will explore ways to teach students about California’s drought and help you incorporate hands-on water conservation activities into your classroom lessons.

WHEN: Tuesday, March 8, 2016

TIME: 4:30-6:30 PM

Registration begins at 4:15 PM

WHERE: Mojave Desert AQMD Offices

14306 Park Ave, Victorville, CA 92392
